**1948**

Our Sixty-Fourth Year

Growers of
AMERICA'S BEST QUALITY FRUIT TREES

SUPERIOR STRAINS EARLIEST TO BEAR TRUE TO NAME

---

Harrison Brothers NURSERIES
BERLIN • MARYLAND
The World's Largest Peach

An amazing feature of the Rio-Oso-Gem is, it will take on a good bright red color and yellow background two weeks before ripening, and even ten days before actual ripening time the percentage of bright red color is decidedly more than most other varieties. When Rio-Oso-Gem is ready to pick and ship it has practically a solid red color. There is no other Peach known that carries such a high percentage of red color on the fruit as this marvelous Rio-Oso-Gem.

EXPERT FRUIT GROWERS SAY O. K.

Rio-Oso-Gem has now fruited in practically every Peach district of the Union. Veteran Peach growers of the nation are loud in their praise of this startling variety. Rio-Oso-Gem has passed the experimental stage and proven an outstanding commercial variety, superseding the famous Elberta of the Victorian era.

BIGGEST PEACH ON EARTH

The Rio-Oso-Gem is a perfect freestone, form is globular, slightly elongated, of extremely large size, averaging in diameter from 2 1/4 to 3 3/4 inches, deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to light crimson and into a rich mottled of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

LARGER THAN J. H. HALE

Rio-Oso-Gem is a larger Peach than J. H. Hale and yields bumper crops, larger than Elberta. In our own and other orchards, Rio-Oso-Gem bears at a younger age than any of the other yellow varieties.

TRAVELS 3500 MILES

One striking feature of Rio-Oso-Gem is the unusually firm texture of the fruit. It will stand up and ship in excellent condition in standard refrigerator cars for long transcontinental hauls of 3500 miles in A-1 shape for the markets.

RIO-OSO-GEM

Ideal for Home Orchards
TWO WEEKS LATER THAN ELBERTA

The Rio-Oso-Gem would be a Peach of commercial importance when ripening at any time during the Peach season, but it is very fortunate that it ripens two weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for Peaches—this variety has sold at very much higher prices than Elberta and J. H. Hale. To prolong your Peach shipping season, we highly recommend to you planting the Rio-Oso-Gem. Harrisons' have planted twelve thousand Rio-Oso-Gem in their own famous orchards. We have the utmost faith in the Rio-Oso-Gem, and we will also make future plantings of this remarkable Peach.

Harrisons' Maryland Grown Peach Trees are the Finest Quality in the World

Prolific Bearer—Rio-Oso-Gem Peach

[2]
Harrisons' Peach Trees are Propagated Direct From Bearing Trees of Superior Strains and Extra Heavy Bearing Habits—This is the Best Type That Is True-to-Name and Will Bear Fruit at an Extra Early Age

**Rio-Oso-Gem—The Outstanding Profit Making Peach—THE BEST PEACH**

**Bears Heavier Than Elberta**
Rio-Oso-Gem is an extremely heavy bearer and on account of its prolific set of fruit, it is necessary to practice extremely heavy thinning. It has hardy, vigorous fruit buds, which insure it being a heavy annual bearer. The tree bears young.

**Ripens Two Weeks Later Than Elberta**
The Rio-Oso-Gem would be a Peach of commercial importance when ripening at any time during the Peach season, but it is very fortunate that it ripens two weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for Peaches.

**COMMERCIALLY TESTED**
America's Highest Price Peach
**PLANT NOW!**

**OUTSELLS OTHER GOOD VARIETIES**
Because of their superiority, Rio-Oso-Gem out-sells other good varieties on the nation's markets at a premium price of 75c to $1.50 per bushel.

**Protected by U. S. Plant Patent No. 84**
Exclusive Propagation and Sales Rights of the Rio-Oso-Gem in the Following States Granted to Harrisons:

**FRUIT TREES SHIPPING SEASON OCTOBER 15 UNTIL MAY 15—ORDER EARLY**

There is a brilliant future in store for the progressive orchardist who plants Rio-Oso-Gem Peach trees.

Harrisons'—The Nation's Fruit Tree Nurseries
NOW, Everyone can grow extra large, rich colored, extra rich flavored, healthful VITAMIN PACKED FRUIT in your own back yard.

SAVE TWO TO THREE YEARS BY PLANTING SUPER-SIZE FRUIT TREES HAVING JUMBO GROWTH

Best Trees Obtainable — Carefully Selected — Specimen Trees

Time is money, therefore, for the additional expense of a few cents per tree you can plant Jumbo size fruit trees and eat the fruit from them surprisingly soon after planting. The Super-Size fruit trees, being especially grown as Jumbo trees, are the strongest growers. They are exceedingly vigorous, ten hardy, and produce tremendous crops of fruit. These are ideal trees for the home garden.

ALL VARIETIES LISTED IN ORDER OF RIPENING

APPELES. Large Transparent (Lodi), Red Gravenstein, Triple Red Delicious, McIntosh Red, Bright Red Jonathan, Grimes Golden, Yellow Delicious, Scarlet Red Stayman, Cortland, Red Spy, Baldwin, Rhode Island Greening.

Prices: Jumbo Size, 6 to 7 ft., heavily branched Apple trees, $3.00 each; 3 for $8.75; 6 for $16.50; 10 for $25.00; 25 for $59.75; 50 for $100.00; 100 for $175.00.

Prices: Jumbo Size, 6 to 8 ft., heavily branched Peach trees, $3.00 each; 3 for $8.75; 6 for $16.50; 10 for $25.00; 25 for $59.75; 50 for $100.00; 100 for $175.00.

PEARS. Koonee, Bartlett, Kieffer.

Prices: Jumbo Size, 5 to 7 ft., heavily branched Pear trees, $3.75 each; 3 for $10.95; 6 for $21.00; 10 for $32.50.

PLUMS. Red June, Abundance, Burbank, Santa Rosa, Methley, Satsuma, Wickson, Stanley Prune, Big Mackey Damson, Grand Duke Prune, Shropshire Damson, Italian Prune (Fellenburg).

Prices: Jumbo Size, 6 to 8 ft., heavily branched Plum trees, $3.75 each; 3 for $10.95; 6 for $21.00; 10 for $32.50.

CHERRIES. Black Tartarian, Napoleon, Montmorency (Sour), Schmidt, Windsor.

Prices: Jumbo Size, 5 to 7 ft., heavily branched Cherry trees, $3.75 each; 3 for $10.95; 6 for $21.00; 10 for $32.50.

APRICOTS. Alexander, Early Golden, Superb.

Prices: Jumbo Size, 5 to 7 ft., heavily branched Apricot trees, $3.75 each; 3 for $10.95; 6 for $21.00; 10 for $32.50.

NECTARINES. Hunter, Sure Crop.

Prices: Jumbo Size, 6 to 7 ft., heavily branched Nectarine trees, $3.75 each; 3 for $10.95; 6 for $21.00; 10 for $32.50.

Pears within 18 months after planting

GUARANTEE ON JUMBO TREES

You take no chances when you buy Jumbo trees from Harrisons. If they are not satisfactory your money will be cheerfully refunded in full, providing they are properly packed and returned within 24 hours after receipt.

Carefully Selected Specimen Trees

It takes years to develop these super selected Jumbo size, heavily branched, thickly rooted, early bearing trees and they are the selection of hundreds of thousands of trees in our nurseries.

Even with our expert scientific propagation methods, record to none in the country, coupled with ideal soil and climatic conditions, all varieties and kinds do not develop the same each season, for this reason we can only supply these Jumbo trees in the kinds and varieties listed here this season. Order early.

Plant Jumbo Size Trees and Pick Large, Juicy Apples in a Surprisingly Short Time

PLANT THE BEST

IN 1948

SAVE TWO TO THREE YEARS

BY PLANTING SUPER-SIZE FRUIT TREES HAVING JUMBO GROWTH

Harrisons’ Jumbo Trees Are Superior

Home Grown Tree Ripened Peaches are Superior in Flavor

[4]
Harrisons’ Jumbo Size Fruit Trees and Plants are Definitely Superior

JUMBO RASPBERRY PLANTS FRUIT FIRST SEASON
Plant Harrisons’ Big, Healthy Raspberry plants and enjoy fruit the first year. We are offering only the two best varieties: Cumberland (black), and Latham (red).

PRICES:
- Jumbo Raspberry Plants
  - 6 for $2.50
  - 12 for $3.90
  - 25 for $6.15
  - 50 for $10.60
  - 100 for $18.50

For Quick Crops Plant JUMBO GRAPE VINES
Big crops of luscious Grapes, some the first season planted. No other fruit bears so much for so little attention. Our Jumbo Grape Vines have already fruited in the nursery.

We can furnish the following varieties only in Jumbo size; listed in their order of ripening: Fredonia, Worden, Concord, Agawam, Niagara, Cottowbo.

Prices: 90c each; 3 for $2.40; 6 for $4.20; 10 for $6.50; 25 for $13.75; 50 for $25.00.

Fruit is Good... Grow Your Own Fruit—Save Money

SPECIAL JUMBO SIZE BLUEBERRY PLANTS
Grow your own berries! Ready to bear big crops of luscious berries on your own grounds and ones as easily grown as a shrub or Rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these jumbo sized plants to offer. Can supply in the following varieties only: Cabot, Rancocas, Concord, Rubel, and Jersey.

Prices: Jumbo size, 4-year-old, 2 to 3 ft., $4.25 each; 3 for $12.00; 10 for $37.50.

SAVING SEVERAL YEARS!
Special Mammoth Bearing Size Peach and Plum Trees
This season, for the third time, we have a few extra early bearing mammoth size, 8 to 10 feet, heavily branched Peach trees to offer. These trees are the best we ever grew. Can supply a limited quantity in the following varieties only: Redhaven, Golden Jubilee, Rochester, Hale-Haven, Champion and Lizzie.

This season for the first time, we have a few extra early bearing mammoth size, 8 to 10 feet, heavily branched Plum trees to offer in following varieties only: Abundance, Burbank, Santa Rosa, Satsumo and Stanley Prune.

Prices: Mammoth bearing size Peach and Plum trees, $5.00 each; 10 for $45.00.

Mammoth Peach Tree With One Summer’s Growth

A Jumbo Size Apple Tree Will Furnish You Fruit and Shade, Too
Dear Friends:

For sixty-four years the business of the Harrisons has been to grow Fruit Trees, Roses and Ornamental Nursery Stock, also commercial fresh fruit growers—this business has grown and developed only through a thorough understanding of the science of horticulture in all its phases with practical use.

When it comes to fruit trees, you can buy them at most any price, but the trees that will produce the biggest crop of really worth-while and saleable fruit, cannot be expected from undernourished trees produced in a haphazard manner with the sole idea of seeing how cheaply they can be grown, thus disregarding standard grades, sizes and specifications and careless as to their parentage.

Now when you buy nursery stock—remember all of it is a living plant—the pedigree, or parents, play an important part in the future results of the very tree you buy—the "hidden value" is the inborn inheritance that becomes the final quality, type, strain, size, color and productiveness so necessary in the future performance—and right here is the very feature which makes HARRISON grown nursery products have superior merits.

HARRISON'S Fruit Trees and Small Fruits are true to name; earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Ornamentals are of the finest types for their respective varieties.

In closing, may we personally take this opportunity of thanking our many, many customers for their continued confidence, for which we are sincerely grateful.

Sincerely yours,

HARRISON'S NURSERIES,
HARRISON BROTHERS, PROPS.
G. HALE HARRISON, GEN. MGR.

64 YEARS LEADERSHIP
OVER 4000 ACRES

This is Your PROTECTION

Every customer is assured of Harrisons' Highest Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Any time trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory, however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within two months after its arrival.

From the PROFIT ANGLE

HARRISONS
‘BUD SELECTED’
FRUIT TREES ARE YOUR BEST BET

Because They Are

- Absolutely True to Name
- Healthy — Vigorous
- Disease free
- Hardy — Budded fruit trees are superior to grafted
- Properly hardened off before digging
- Propagated from bearing trees of selected strains
- Come into bearing earlier
- Yield bigger crops of better fruits
- Have larger roots
- Take hold quickly in new locations
- The best trees for less money

MONEY IN FRUIT GROWING
Leading Orchardists Prefer Harrison Grown Fruit Trees

Alive, Healthy Fruit-Bearing Trees Depend on the Heredity

Many, many years ago the Harrisons introduced a new method of propagation that was later to revolutionize the industry. Seeking out a better method of propagation in the interest of securing dependable in true-to-name varieties, we selected new budding stock from our own orchards, taking only those trees that were stamped “super-quality.”

These new bud selections of known origin were later to become new orchards, and so through a desire to make more profits, we were able to help our fellow orchardists in cashing in on our experience.

You Pay No More for Harrisons’ ‘Bud-Selected’ Trees

The “bud-selection” method to propagate fruit trees is very expensive—but whatever the expense they are the trees that give satisfaction.

With 1750 acres of bearing orchards and a trained organization operating twelve months a year, we are organized on a large production basis, which reflects lower prices both for the commercial grower and the home owner.

Northern Growers take no risk in buying Harrisons’ Superior Fruit Trees, Berry Plants and Ornamentals.
We absolutely guarantee Harrisons’ Berlin-grown fruit trees, berry plants and ornamentals, variety for variety, are as hardy as any stock grown in any locality north of us.

Harrisons Offer the Greatest Selection of Dependable Fruit Varieties in America
The peach grower has a bright and profitable cash future—we advise you to plant a peach orchard this year, as the number of peach trees in bearing is the smallest of any time during the past fifty years.

THE REASONS BACK OF GROWING SUPERIOR STOCK
A—Our organization has over 64 years experience.
B—Every step in growing under the personal supervision of the Harrison Brothers.
C—One hundred and fifty thousand trees in Harrison Brothers' orchards from which our propagating trees are selected.
D—Use of modern methods for planting, cultivating and digging.
E—Over 4,000 acres of various types of soil.
F—Ideal soil and climatic conditions.
G—Co-operation with leading horticulturists and experimental stations all over the world.

Harrisons' Maryland Grown Peach Trees are the Finest Quality in the World

Plant Big Peach Trees for Quickest and Best Results

Grown on the "Brink" of the Atlantic

Our favorable climatic conditions, being located only eight miles from the Atlantic Ocean, with our rich soils of various types, coupled with the latest scientific and practical methods, as well as an unusually large number of experienced nurserymen, with ample facilities, enables Harrisons' to grow America's foremost, finest and best quality, true-to-name fruit trees, with superior merits and extra heavy annual bearing habits. Which we guarantee, with proper care, will produce bumper crops in any fruit-growing section of the United States.

Fruit Growers
Look at fruit trees in other nurseries, then come to Berlin and see the superior quality of Harrisons' true-to-name varieties at attractive prices. See the fruit trees growing in the nurseries—know what to buy. For best results, plant dependable Harrisons' grown trees.

May be assorted varieties of Peach Trees. For Jumbo Peach Trees, see page 4.
The Sensational

REDHAVEN

Tops All Extra Early Peaches, Earliest Yellow Freestone Peach

THE NEW EARLY RIPENING YELLOW PEACH THAT RIPENS ABOUT TEN DAYS BEFORE ELBERTA.

The most promising early ripening yellow freestone Peach ever introduced. A cross between Hale-Haven and Kalhaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Reddens before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. We have a good supply of genuine Redhaven trees this season. The demand for this variety is heavy, so order early.

RED BIRD

EARLIEST OF ALL PEACHES
Most Popular Extra Early Market Peach

Bright glowing color—"red as fire"—on a background of creamy white.

Handsome. Large—as large as Elberta. Ripens about 45 days before Elberta. Clingstone. Good to eat and fine for pies, cobbler and peach pickles. Quality good, especially when left on the tree until they get fully ripe.

"Break all young-bearing records." "Break all bearing records." "One crop paid for my whole orchard." "Most profitable early Peach." "Sell fast as can ship." "Better shipper than Elberta."

YOUNDER BEARING

Do you want your trees to come into bearing at an early age? It is a recognized fact that trees propagated direct from bearing trees will commence to fruit at an earlier age than trees that are propagated from non-bearing scions. Harrison Grown Fruit Trees, due to the fact they are budded from bearing trees, will produce profit-paying crops in the earliest possible time.

HARRISONS' Super-Selected Strain Varieties Bear Bigger and Better Crabs of Peaches.

INCREASES YOUR PROFITS AT NO EXTRA COST

RED BIRD PEACH

EARLY HALE-HAVEN

(R. S. Plant Patent No. 325)

RIPIENS A WEEK EARLIER THAN GOLDEN JUBILEE HALE-HAVEN

A bud sport of the well known Hale-Haven, retaining all its characteristics such as large size, high red color before ripening, extra fine flavor and yet ripening a week earlier. Tests show it will keep as well as Hale-Haven.

A very promising new commercial variety. We recommend every grower to plant a few trees so as to compare its merits with other varieties ripening at the same time. We are confident that you will like Early Hale-Haven and that it will be a profitable Peach for you to grow. Our trees were propagated from the original strain. 10c per tree extra.
Goldeneast
(N. J. 87)
Developed by the Master Plant Breeders of New Jersey

VERY LARGE—FIRM—ATTRACTIVE
Ripens early midseason, very large oval, firm, high color, yellow flesh, freestone, smooth, nearly fuzzless like J. H. Hale, one of its parents. Colors several days in advance of its ripening. This, combined with its very slow rate of softening, makes it an ideal Peach for commercial growers. Hangs well to the tree after the Peaches become firm ripe. This is a distinct advantage to the grower who sells locally and ships short distances Goldeneast, as grown in New Jersey, is distinctly superior to the older varieties that ripen at its same season. Quality of its fruit is very good.

A REAL PROFIT MAKER
GOLDENEAST has been fruited commercially in New Jersey and Maryland for several years. During this time it has tapped all varieties in price on the New York and Philadelphia markets for several days at a time. Growers with a vision should plant Goldeneast. Our trees were propagated direct from bearing trees in New Jersey.

Hale-Haven
Early midseason. Ripens just after Golden Jubilee has been harvested and about 14 days ahead at Elberta. Yellow freestone, large, high red color, firm flavored. It takes on red color early and the Peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. When allowed to ripen fully upon the trees its flavor is undoubtedly the best of any yellow Peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parent is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardness, large crops yearly and strong growth. It is the best variety ripening between Golden Jubilee and Elberta and should be planted in every orchard.

Golden Jubilee
Early. The supreme early yellow Peach. Commercial Peach orchardists for a century have been looking for an early Peach of high quality, fine flavor, yellow, freestone, attractive color and firm texture, and eventually they have found it in the marvelous Golden Jubilee. This variety is a variation of recent introduction of new varieties and is by far better than any early variety of commercial importance which has been introduced in many years. It ripens about ten days ahead of Hale-Haven.

LEADING ORCHARDISTS PREFER HARRISON GROWN FRUIT TREES
THE BEST WHITE MID-SEASON VARIETY

Ripens midseason. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach of its season, ranking almost with Elberta in this respect. Because of its many desirable qualities, it has become standard in the large commercial orchards, and you can find few orchardists of any importance who do not have a block of Belle in their orchards. These men know from experience just what varieties pay best and endorse it highly.

Stark Early Elberta

Early midseason. Yellow, freestone, large, lemon-yellow with a dark cast, blushed with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor, rich golden, tender flesh, yet firm and has a delightful flavor; excellent for canning.

10 OUTSTANDING REASONS FOR PLANTING SULLIVAN EARLY ELBERTA

1—Size: Large to Extra Large.
2—Yellow Freestone.
3—Rich, Sweet Flavor.
4—Brilliant red Colored with Golden Yellow Background. Excellent Long Distance Shipper.
5—Tree Vigorous Grower.
6—Bears Large Crops Annually.
7—Colors a Week Earlier Than Elberta.
8—Ripens Slowly After Being Picked.
9—Brings Highest Market Prices.
10—Completely Tested.

SULLIVAN EARLY ELBERTA PEACH—The Best New Midseason Variety
ELBERTA

Internationally Famous—The Standard by Which All Other Peaches are Judged

Midseason. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red, firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any Peach. It has been the standard for all other Peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

Save Disappointment—Plant Only Harrison ORIGINAL STRAIN Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of $1.00 to $2.00 per bushel on the New York and other leading fruit markets.

They Cost No More

Why plant degenerated strains of Elberta when you can plant Harrisons' heavy yielding original strain trees. They can be purchased at the lowest price that high quality trees can be produced for. It is true trees, size by size, can be produced cheaper by budding them from non-fruiting trees in the nursery row, but this method causes degeneration. Trees grown in this manner will be lighter croppers and require a longer time in coming into bearing.

Greater Profits from Harrisons' Original "BUD" Strain

Plant Harrisons' Superior Strain and Reap the Cash Benefits

It's a Yellow Freestone—Midseason

Stamina—Uniformity—Best Canning—Premium Prices—Public Demand

The large fruit, being uniform in size and shape, along with its high, attractive red color and firmness, also its ability to stand shipments of three thousand or more miles under refrigeration in cars for 2 or 3 weeks before being consumed, but with stamina enough to still look its best, has won Elberta the reputation of being a Peach without a peer and the variety which is always in favor and strong demand with the buying public, therefore demanding the highest possible market prices. Elberta is by far the best canning Peach.

Thousands Acclaim the Superiority of Harrison-Grown Trees

Harrisons' pride themselves in propagating from the original Elberta strain, buds of which were personally cut by the late Senator Orlando Harrison from the original Elberta mother-tree in the Rumph orchard in 1889.

We have two commercial orchards, now 51 years old, of these wonderful original strain Elberta. Besides yielding bumper crops annually, they are the source of our present supply of original strain buds for the new young trees.

For years our Elberta Peaches have been the background of handsome Peach profits. You can do the same if you plant Harrisons' original strain Elberta—it's your best bet.

America's No. 1 Peach—Elberta. More Elberta Peach trees in bearing than any other variety on earth.

The Best Variety—Elberta Commercial

Tree is vigorous, very hardy, sturdy, thrives in widely different localities. Elberta is harder in bud than most varieties, and is a uniform prolific bearer. You can always depend on Elberta as a sure cropper.

Prices on Page 8.
Of the late PEACH KING

Originated by the late J. H. HALE

MIDSEASON—Ripens 2 to 3 days before Elberta.

Original Strain

Our "Hales" are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia, known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach.

The original strain necessitates cross-pollination and it is necessary, for proper results, to plant a few Belle of Georgia or Elberta or Hiley or any other variety of Peaches along with Hale for cross-pollination.

Extra Large Size

Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about two or three days prior to Elberta. Prices on page 8.

Harrisons’ Peaches

ARE A COLLECTION OF

THE WORLD’S BEST

Brackett

Mid-Season Late

1. Size
2. Quality
3. Color

A Profitable Commercial Variety Slightly Later Than Elberta

Brackett is a comparatively new commercial Peach in some sections but wherever tried it has given uniformly good results. During the past thirty years we have planted many thousands of this variety in our own orchards and they have given good results.

The fruit is rich yellow, with dark carmine cheek. The size runs fully as large or larger than Elberta and fruits weighing five to six ounces are common. Flesh is deep yellow, extremely juicy and is absolutely freestone. Fruit is much better flavored than Elberta. Good shipper.

Popular on the Markets

Brackett commands unusually high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We know that the grower who needs a Peach that ripens slightly later than Elberta will make no mistake in planting Brackett.

Plant Harrisons’ Original Strain

HARRISONS were the first to popularize this great variety and distribute it throughout the Peach-growing sections. We offer trees that are propagated direct from the original strain and they are sure to produce results.
OTHER VERY EARLY VARIETIES

DIXIREO. Very early, yellow, cling, medium size, round, bright attractive red blush; good flavor; prolific bearer. Ripens two weeks earlier than Golden Jubilee or about three days later than Red Bird. A new variety originated and introduced by the U. S. Department of Agriculture, Beltsville, Maryland. Its most outstanding commercial feature is that it is a good shipper and has been planted extensively in Georgia to meet the demands for the very early Peach market.

GREENSBORO. White, freestone, extra large for such an early Peach. One of the handsomest, being a large, yellowish white with crimson cheek; flesh is white and of average quality. Exceedingly hardy, being an extra heavy, prolific bearer and adapted far wide variations in Peach regions.

JUNE ELBERTA. A big, handsome red and gold Peach, highly colored, excellent quality and a dandy home Peach, being a new variety. One of the earliest of the good yellow-fleshed Peaches, this semi-freestone variety quickly returns cash dividends before later varieties reach the market.

CUMBERLAND. An outstanding favorite early white Peach. Is a comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Golden Jubilee.

DIXIGEM. Early, yellow, semi-freestone, red blush, medium size, good quality. Ripens a few days sooner than Golden Jubilee. A new variety originated and introduced by the U. S. Department of Agriculture, Beltsville, Maryland. Extensively planted in Georgia.

TRIOMEM (N.J. 70.) Early, yellow, freestone, oval, red all over; medium large. Ripens two days later than Golden Jubilee. One of the outstanding New Jersey varieties.

OTHER EARLY MIDSEASON VARIETIES

CHAMPION. A Good Home Peach. White, freestone, very large; creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive.

ROCHESTER. Early midseason. Yellow, freestone, large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early midseason yellow freestone Peaches for nearby markets, and highly desirable for canning.

VEDETTE. Early yellow freestone. Globular; large; good red color; good flavor. Canadian variety of the Elberta type. Ripens about six days later than Golden Jubilee. Adapted to Southern as well as Canadian Peach districts.

SUNHIGH. (N.J. 82.) A large, red, bright, smooth Peach which colors well all over before it ripens, softens slowly, making it a good commercial Peach. Flesh inclines to adhere to the pit when hard ripe. The variety seems to do best in hilly sections and requires thorough summer spraying. The fruit is large, roundish, thick-skinned, very uniform in size. Color deep yellow with red cheek. Stone is tree. Ripens approximately eighteen days before Elberta, at a time to bring high market prices.

HILEY. White. Early midseason. Bears huge crop at fancy Peaches. Freestone, medium size, highly red colored and is a very handsome Peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. You can depend on Hiley to bear heavy crops year after year. The marvelous color and wonderful flavor have made it popular on the markets. Hiley resembles Belle of Georgia but ripens about 10 days earlier.

SOUTH HAVEN. Early midseason. Yellow, freestone, large, handsome, uniform size, delicate flavor, ripens about 15 to 18 days ahead of Elberta. Tree is very hardy, good grower and a consistent heavy bearer, adapted to cold climates; produces bumper crops in mild climates.

SUMMERCREST (N.J. 94.) Midseason, yellow, freestone, large with red blush and sweet flavor. Trees exceptionally vigorous, fruit ripens the same time as Belle of Georgia, which is a few days earlier than Elberta. Popular in New Jersey where it is known.
Genuine
SHIPPERS LATE RED

Midseason-Late. Large, round, yellow, freestone, very attractive with high red color. It is a Hale type of Peach, having good quality and brings high prices on the fruit markets. Ripens three days later than Elberta. A good commercial Peach as it is a prolific bearer of large size, highly red colored Peaches and is a favorite wherever planted. Harrisons are growing the original strain of Shipper Late Red which is far superior to other types and strains of this variety. Should be planted in every commercial orchard, as well as home orchards.

PLANTERS BEWARE!
1-Year Budded Peach Trees Are Far Superior, Very Much Hardier, Stronger Growers, Live Longer, Also Producing Much Larger, Better Crops Than "June Buds"

Plant Only the Best

Late Ripening Varieties

LATE ELBERTA (Gemmer's Late Elberta). Late, yellow, freestone, large, high red color, fine quality, good shipper. Is a typical Elberta in fruit and tree characteristics, but ripens 8 to 12 days later than Elberta of the original strain.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 24 to 26 days later than Elberta, having some prominent coloring characteristics as its parent.

Harrisons' volume production has enabled us to supply you with high quality nursery products at low prices. All varieties are within reach of any home planter and fruit grower and priced to save you money. We ship everywhere. State and Federal inspected.
APPLE GROWING PAYS PROFITS

But in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrisons' Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best Apple trees of superior merits it is possible to produce. Harrison-grown Apple trees are propagated on whole root stock, insuring an unusually large root system which is the basis of plant growth. Our Apple trees are scientifically budded from selected heavy bearing strain trees of the variety desired, using the bud selection system. Today we believe that we have more of the improved and best strains of Apples in our nursery than any nursery concern in America. Do not allow a few cents per tree to keep you from buying Harrison-grown Apple trees, the finest and by far the best quality produced on the North American Continent.

TRUE TO NAME

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name.

In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of the world's most eminent authorities on tree identification of the Massachusetts True-ness-to-Name Inspection Service.

To Whom It May Concern:

All of the one- to three-year-old Apple, Plum, and one-year Pear and Sweet Cherry varieties propagated and now growing in the nurseries of Harrison Brothers Nurseries, Berlin, Maryland, have been examined by the Massachusetts True-ness-to-Name Inspection Service. To the best of our knowledge, these trees are true-to-name as they now stand in the nursery rows.

For Jumbo Apple Trees, See Page 4

RESULTS COME SEVERAL YEARS HENCE

No one can measure in advance the future results of a newly planted orchard. A few years must come and go before the trees bear fruit. A good inheritance immediately qualifies it as a money-maker, fruit is large and true-to-name. Poor trees at any price never give satisfaction.

Sixty-four years of dependability and square business dealings finds Harrisons' today the best place in America to buy truly dependable trees.

Millions of Harrisons’ “bud selected” fruit trees planted throughout the years are today the very backbone of a profitable and dependable fruit business in all sections of the country.

HARRISONS' TREES HAVE A GOOD RESERVE OF PLANT FOOD

Harrisons' trees are scientifically nurtured so that the trees will absorb the different latent plant growth elements so vitally necessary in the successful growth of trees after transplanting. This stored-up energy is one of the many reasons why Harrisons' trees prove successful wherever planted.

HARRISONS' HARDY APPLE TREES

We absolutely guarantee Harrison-grown apple trees, variety for variety, to be as hardy or harder than trees grown in any locality north of us.

Harrisons' Super-Selected Trees

with their unusual substantial root system, are proving again and again that "bud selected" strains yield yearly profits to orchardists and commercial planters.

Alarming Apple Orchard Shortage

U. S. Department of Agriculture census figures reveal—"In 1946, 000,000 fewer Apple trees on U. S. farms and orchards than in 1910, although the population of the United States has increased by 59,000,000! And of the trees now on U. S. farms and orchards, many are trees that will rapidly pass out of profitable production!"

Plant "Bud-Selected" Super-Strain Trees
LARGE TRANSPARENT (LODI)
A New Summer Variety

Ripens Very Early—Destined to Replace the Ever Popular Yellow Transparent

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the demand for an Apple of this type.

Somewhat of a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear yellow, white flesh, of medium size. A good pollinator.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that’s what we mean. It can be done—here’s why: Yellow Transparent Apples are always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easy on its big brother, “Large Transparent,” which ripens at the same time.

Large Transparent Apples Average Up to ½ Inch Larger Than Yellow Transparent. This Means $1.00 to $2.00 Per Bushel Extra.

SUMMER APPLES
Renowned for Bearing at an Early Age

YELLOW TRANSPARENT. Medium size, greenish yellow, very heavy bearer. Most widely planted yellow early variety.

RED GRAVENSTEIN. Much better color than the original Gravenstein. Has practically replaced the old strain of well known Gravenstein. The crimson red summer Apple for export.

RED SUMMER RAMBO. A new earlier coloring solid red strain means much greater profits for growers everywhere.

SUMMER RAMBO. Large, splashed with red.

EARLY RED DUCHESS. Highly colored early Apples bring premium prices, this bud sport colors red all over early in the summer. Excellent pollinator for Red Gravenstein.

WILLIAMS EARLY RED
Ready Early When Folks Just Get Hungry for Apples

WILLIAMS’ EARLY RED
The Big Red Home or Market Apple

Just at the time when people are hungry for a fresh, new red Apple this superb sort comes into market. In New York, Boston, Philadelphia, and other eastern cities as well as middle western and southern cities, the fruit sells as quick as it hits the market-house or dealer’s store. It holds its own anywhere and has proven to be—

The Best Summer Apple

The rich bright red fruit catches the buyer’s eye and is ordered at a price that yields the grower a good profit. Apple is large, with tender, crisp, white flesh, juicy, slightly tart. The trees bear very young, producing freely and steadily. Fine for a filler or permanent tree, and being hardy, can be successfully grown in New England states and Canada. All orchards should include Williams Early Red. A good pollinator for Red Yorkling and Red Rame Beauty Apple trees.

Budded Apple Trees are Far Superior to Grafted Apple Trees

Plant Summer Apples and Get the Big Cash Profits Before the Autumn and Winter Varieties Ripen
APPLES

This Apple was introduced by us several seasons ago and since its introduction has been bought and fruited by the tens of thousands by leading fruit growers throughout the country. It is a "bud sport" of unusually superior merits, being triple-red colored and the earliest red coloring strain known.

Colors Much Earlier Than Ordinary Delicious
Harrisons' Triple Red Delicious colors up weeks earlier than the ordinary strain. By coloring earlier the fruit can be picked while it is firm and it keeps better in storage.

Size and Taste
Size is all anyone could desire, or it runs from large to extra large. The large size, bold red color and characteristic five-knob make it attract buyers in every market.

Taste will be found on a par with its other points of advantage. The flavor is rich, slightly sub-acid, with an individuality which makes the palate call for more. You'll have no trouble with repeat sales for this variety.

Ships and Keeps Well
Harrisons' Triple Red Delicious ships without bruising. In fact, it ships better than the ordinary Delicious because its earlier coloring permits it to be picked when the fruit is more firm. Its large size makes it easy to pack attractively and the uniformity of size guarantees a good appearance.

Large Profit Maker
The ordinary Delicious is a proven profit maker and our Harrisons' Triple Red Delicious is destined to outclass its predecessor due to the fact that it will produce more highly colored fruit and as most every fruit grower knows, color plays an important part in the price the fruit sells for.

FINEST FLAVORED RED APPLE IN THE WORLD

LEADING FRUIT GROWERS PROCLAIM HARRISONS' TRIPLE-RED DELICIOUS IS SUPERIOR TO ALL OTHER STRAINS

Leading orchardists and fruit men of the country who have seen the Harrisons' Triple-Red Delicious in fruiting claim it is superior to any of the other several new double red earlier coloring strains of Red Delicious such as Starking, Richfield Delicious, Shetwell Red Delicious, and others.

This past season our Harrisons' Triple-Red Delicious colored weeks earlier than the ordinary Red Delicious. Growers expressed amazement at the difference in color of these two distinct strains. Trees looked like they were loaded with balls of fire, each Apple sold bright red in color.

SOLID BRIGHT RED COLOR
Starts Coloring During Early August—One Month Before Ripening
GLORIFIED RED APPLE OF THE WORLD
Ideal for Home Orchards

Harrisons' Triple-Red Delicious is not only a commercial Apple, but it is every bit as well adapted to the home grounds. Whether you wish to plant a thousand or if you have room for only one tree, Harrisons' Triple-Red Delicious will give full value.

Why pay premium prices for other improved strains of Delicious when trees of Harrisons' Triple-Red Delicious, the earliest coloring, heavy-producing type, being superior to all others, can be bought from Harrisons' at a lower cost.

A NATIONAL SCARCITY OF FRUIT TREES
There is a drastic shortage of fruit trees throughout the nurseries of the United States; as a matter of fact, the smallest supply available for 1948 orchard plantings that there has been at any time during the past fifty years. A recent national survey shows that fruit trees will even be more scarce during the next two years than now. Place your order now while trees are available.

YELLOW DELICIOUS

A golden yellow Apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds the flavor and condition at its best. Many people think it superior to the famous Delicious.

Yellow Delicious is a national favorite. No other Apple has such an appeal to the appetite. Folks cannot resist buying them when displayed for sale.

A PROLIFIC CROPPER AT AN EARLY AGE
The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can depend on a good yield of ripened fruit each year.

Harrisons’ Famous

GRIMES GOLDEN

Selected "Big Yield" Strain
BEST HOME ORCHARD APPLE

Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored Apple known, and a
good keeper. No better variety exists for eating raw or for cooking.
Tree is very hard, and one of the heaviest bearers known, pro-
ducing extra large crops annually. Excellent variety for a filler, as
it comes into bearing very early. Grimes Golden is the best
pollenizer known especially for Stayman Winesap, Lowry, Baldwin
Cortland, Rome, Winesap McIntosh and others. Be sure to in-
clude Grimes Golden in your orchard. IT IS EASY TO GROW

Little Orchards Make More Profit Than Big Farms

YOUNGER BEARING

Do you want your trees to come into bearing at an early age?
It is a recognized fact that trees propagated direct from bearing
trees will commence to fruit at an earlier age than trees that
are propagated from non-bearing scions. Harrison Grown Fruit
Trees, due to the fact they are budded from bearing trees, will
produce profit-paying crops in the earliest possible time

Make Money With Harrisons,
Super Red McIntosh
Earlier Coloring—Solid Red Strain

A new strain of McIntosh Red that starts coloring earlier
and produces a larger percentage of extra fancy fruits.
Super-Red McIntosh, when allowed to mature on the trees,
is slightly darker in color than our regular improved
McIntosh Red. Has all the best qualities of ordinary McIntosh
and will mean larger profits for growers who have been
unable to get sufficient color. McIntosh has been the fa-
vorite in the North; this new strain extends the planting
area farther south. The most highly colored solid red strain
available, regardless of price. We have some exceptionally
good one-year trees and a few two-year trees to offer this
season. Plant McIntosh strain of Apples for big profits,
equally as good in home orchards as it is commercially.

McINTOSH RED. Medium large size, generally considered
highest and best flavored Apple grown. Splendid appear-
ance which sells it on sight.

SUPER RED McINTOSH—A Northern Favorite

BRIGHT RED

JONATHAN

SOLID RED COLOR
ALL OVER

A Great Improvement Over the
Ordinary Jonathan

We searched the country over to find a strain of Jonathan that
had more color than our selected Big Yield Strain Jonathan. After
thousands of miles of travel inspecting all of the new strains of this
famous variety we found the one we had been looking for. It
colors solid red several days earlier, otherwise it is identical with
ordinary Jonathan. Growers who want more, deeper colored Apples
will find our Bright Red Jonathan the best colored strain obtainable.

JONATHAN. Medium to large, red, juicy. Good keeper and an
excellent shipper. Excellent pollenizer for Triple Red Delicious,
Mammoth Black Twig and other varieties.

[20]
The Appalachian Winner

RED YORKING
WITH TEN TESTED REASONS

1—York Imperial has long been the commercial leader and money-maker in Virginia, West Virginia, Maryland and Southern Pennsylvania, but with the discovery of a "bud sport" strain from a Harrison-grown York Imperial planted near Slipperymond, Pennsylvania, the new "Red Yorkling," U. S. Patent No. 125, will eventually replace its famous parent.

2—Leading fruit growers were astounded and now proclaim that Red Yorkling is the ideal commercial Apple for the Appalachian region.

3—Red Yorkling, by actual comparison, has proven to be far superior to any other so-called red strain of York Imperial.

4—Color: Every Red Yorkling Apple being SOLID RED is a tremendous advantage.

5—Colors very early—being able to pick and ship Red Yorkling from three to five weeks earlier than York, due to its 100% solid red color before the Apple is fully ripe.

6—Will bear bumper crops each year under modern up-to-date orchard management, and Red Yorkling is a more prolific bearer than its parent.

7—Red Yorkling can be easily packed U. S. Fancy grade from three to four weeks sooner in the fall than you can possibly pack York Imperial to meet the requirements of U. S. No. 1 grade.

8—All Apples of Red Yorkling will run U. S. Fancy grade and U. S. No. 1 grade as to color requirements, whereas you always have a varied percentage of York Imperial that will fail to meet even U. S. No. 1 color specifications.

9—For export trade, Red Yorkling can be sold and shipped at premium high prices long before York Imperial is ready to pick.

10—For cold storage purposes, Red Yorkling does not "scald," even when held until June; whereas York Imperial must be sold during the winter to avoid "scald" and other cold storage troubles.

YORK IMPERIAL. Red, medium to large size. Widely planted in Appalachian area. Good pollinator for mid-season and late blooming varieties of Apples.

Scarlet Red Stayman
BRILLIANT COLOR

We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A READY MARKET AT TOP PRICES

Scarlet Red Stayman is the best general purpose Apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

KEEP CRISP AND JUICY UNTIL LATE SPRING

Because this new strain takes on solid red color weeks earlier, allows it to be picked when it is hard ripe, thereby making it keep much better during the winter and spring.

NO INCREASE IN PRICE OVER OTHER VARIETIES

We grow Scarlet Red Stayman Apple trees by the tens of thousands and improved methods of production and low selling costs enable us to sell you the very best strain of Stayman at no increase in price over ordinary varieties. Most nurseries ask more for their so-called improved varieties, but you can plant the improved Scarlet Red Stayman with our assurance that it is the best strain of Stayman available regardless of price. Pollinate with Grimes Golden and Red Yorkling

STAYMAN WINESAP
BIG YIELD STRAIN

Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. This strain yields bumper crops year after year. It colors to a good bright red and gets nearly solid red colored when allowed to stay on trees until fully ripe. This is an improved strain and is preferred by many growers in the East. Tested and time-proven by thousands of growers.

MAMMOTH BLACK TWIG (Paragon). Extra large, dark red; good flavor. Must be pollinated with Jonathan.

This is a Flaming Triple Solid Scarlet-Red "Bud Sport"

**Renowned for Bearing at an Early Age**

An improved Rome Beauty, identified as in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy.

**Superior to All Other Tested Strains of Rome**

Harrisons' strain of Red Rome Beauty is the best of all Rome Beauty types and because of its improved and early ripening and red color characteristics, will eventually replace the Rome Beauty. Already the Red Rome Beauty is a star among leading commercial varieties of winter apples. It pays to grow them.

Red Rome Beauty is easy to pack U.S. Fancy grade while most strains at Rome Beauty have just enough color to pass the requirements of U.S. No. 1 grade. Excellent pollinizer for Red Yorkings and Williams Early Red.

**ROM BEAUTY.** Large, round, red, flavor and quality above average.

**GALLIA BEAUTY.** A Rome Beauty type of Apple. Identical in every respect, except its earlier coloring qualities. Recommended for commercial planting. Harrisons' have the genuine original strain of Gallia Beauty.

**LOWRY.** Beautiful mahogany-red, good, medium size, round oval shape, nearly sweet, mild sub-acid; excellent flavor, good shipper, long keeper, and sells at fancy prices in export as well as domestic markets. New, popular commercial variety in Virginia.

---

**Expert Nursing**

These world famous super-selected trees are definitely superior. Literally 64 years of experimentation, acclimating and "expert nursing" are behind the fruit trees developed and grown at the—

**HARRISONS' BIG NURSERIES BERLIN, MARYLAND**

**PLANT A HOME ORCHARD NOW**

---

**SOLID RED WINESAP**

Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red colored Winesap, we recommend our new strain.

**WINESAP.** Medium size, dark red, high flavor. One of the best and longest keepers.

---

**RED LOWRY APPLE—A Favorite in the Virginias**

---

**SOLID RED WINESAP—Fine Flavored, Long Keeper**

---

**HARRISONS' True-to-Name Selected Strains**

**RED LOWRY.** Red bud sport strain, identical with its parent Lowry in all respects with the exception that it has much higher red color and when matured full red color. It can be picked 2 to 3 weeks earlier than Lowry, due to its earliness in season and color. Interplant a few Grimes Golden.

**SMOKEHOUSE.** Large apples of superfine flavor, excellent for eating; yellowish green mottled with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

---

**Reagan**

---

**Lefton**

---

**Favoriet.** A favorite in Virginia. Red, firm, good flavor, an early keeper. One of the best and longest keepers.

ANOTHER SPORT the New RED SPY

A new "bud sport" from New England. Identical with the ordinary Northern Spy in fruiting habits. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every Apple being solid red in color. We recommend it for commercial and home plantings in northern states. Pollinize with Red Rome Beauty or Williams Early Red.

DOUBLE-RED BALDWIN—An Old Favorite in a New Dress

DOUBLE-RED BALDWIN. Although the common Baldwin is being gradually replaced by other varieties this Double-Red strain will bring new profits to the grower of Baldwins. Must be pollinated. Use Wealthy, Jonathan or Cortland.

OTHER SUMMER APPLES

STARR. Large, attractive with bright yellowish, smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and of extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shipper. Popular in Southern New Jersey.

DUCHESS OF OLDENBERG. Large, striped, tender, juicy, sub-acid; good; regular and abundant bearer. One of the hardiest. Best pollinizer for early blooming varieties.

TWENTY OUNCE. Very large, fine quality, yellow striped red.

WEALTHY. Medium to large size; round, almost solid red; flesh white or a little stained, tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

EARLY McINTOSH. Resembles its McIntosh parent in appearance, but is less aromatic. An attractive, uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, hardy, healthy, productive, and bear annually if thinned early and severely. The shape and framework of the tree, especially the heavy-budded branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

Other Autumn Apples

CORTLAND. A new variety resulting from cross pollinization of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red Apple, approximately the same size and fine flavor of the McIntosh, but ripens three weeks or a month later. Good keeper.

NORTHEASTERN GREENING. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive Apple when packed in bushels, demands good prices; excellent baking Apple. Should not be planted extensively, because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young. Pollinize with Duchess.

Harrisons' Fast Fruiting Strains

Grown by Harrison Brothers
Berlin, Maryland

CRAB APPLES

Priced on page 16
Double Purpose—An Ornamental and Fruit Tree Combined

HYSLOP. Deep crimson, large size, sub-acid and of good quality. Fine for all kinds of preserving, canning, etc., and good to eat fresh. Tree handsome.
The Sensational New

STANLEY PLUM

PRUNE TYPE

European. Mid-season-late. A comparatively new variety which has shown exceptionally good results wherever planted. The fruit is of the Prune type, excellent for cooking or eating out of hand. Tree is healthy, vigorous and produces full crops annually. The fruit is large in size, dark blue with thick bloom, flesh greenish yellow, juicy, fine grained, tender, firm, sweet, pleasant; quality good to very good; stone free. This variety is becoming a valuable commercial variety.

ITALIAN PRUNE

FELLENBERG

(European.) Late. Moderately large fruit; purplish blue-black with greenish yellow flesh changing to yellow; juicy, firm, sub-acid, slightly aromatic, delicious flavor; stone free. Good for drying, and when allowed to become fully ripened, excellent for eating. Tree unusually large, hardy, very productive, well formed and bears regularly. The world’s best long distance shipping Prune. We have the genuine strain of Italian Prune, sometimes called Fellenberg, which is now America’s leading commercial variety, but is being challenged by Stanley.

ABUNDANCE. Early, large; color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender; pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

GRAND DUKE PRUNE. Late. Commercial variety. Purplish black, juicy, sweet, excellent for cooking.

METHLEY

A recent introduction which is rapidly gaining popularity due to its fine quality and handsome appearance. The fruit is medium to large in size, reddish purple in color with red flesh. It is juicy, sweet and of distinctive flavor. The tree is vigorous and upright in growth habit. Does well on most types of soil and is a heavy annual bearer.

Plant Three or More Varieties of Plums for Pollination, Insuring Better Annual Crops

STANLEY PRUNE PLUM—Equally Good for Cooking or Eating

FOR JUMBO SIZE PLUM TREES, SEE PAGE 4

Tested Reasons—For Planting Stanley

- Large, juicy, sweet
- Exceptionally fine quality
- Healthy annual bearer
- For cooking or eating fresh
- Outstanding in commercial plantings

LOMBARD. Midseason. Medium size, showy purplish red fruit, excellent quality for canning, cooking, preserving or spicing. Prolific cropper.

RED JUNE. Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat mealy, sweet, aromatic. Trees are healthy and productive. An early market Plum.

SANTA ROSA. Early. Fruit very large size, round, purplish red, flesh reddish near skin, firm, juicy, and has a pleasant tart flavor, of exceptionally high quality.

WICKSON. Midseason. Extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

YELLOW EGG. Late. Large, golden yellow. Good for cooking. Largest and handsomest of all Yellow Plums.

TRUE-TO-NAME

The World’s Foremost Fruit Variety Identification Specialists

Have Examined Harrison-Grown Trees and Pronounced Them True-to-Name

In addition to carefully selecting the propagating stock from trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and others, Professors of Pomology of Massachusetts State College Amherst, Mass. These men are the world’s foremost fruit identification specialists and they have pronounced our trees true-to-name.

BIG MACKEY DAMSON PLUM

Late. Largest and best Damson, being an improved strain of Shropshire Damson. Freestone. Deep purple, juicy, rich flavor; small stone. Fine for preserving. Easy to grow, produces immense crops. Should be planted in every orchard. Large size fruit makes ideal jams, preserves and jellies. An excellent variety for fresh fruit shipments to city markets, always demanding high prices.

SHROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

BURBANK. Early, about one week after Abundance. Large, Cherry-red with thin lilac bloom. Flesh amber-yellow with rich, sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

FORMOSA. A midseason variety of excellent and prolific bearing qualities. Large greenish yellow, overlaid with red. Alternate bearer. Heavy cropper.

SATSUMA. Midseason. Best flavored semi-freestone, blood-flesh Plum known. Large size. Flesh dark purplish red, juicy, sweet, possessing an alluring aroma. Originated by Luther Burbank.

NECTARINES

Delicious for Eating

There is a mistaken idea that the Nectarine is a cross between the Peach and something else, while it is really nothing more or less than a smooth-skinned Peach. The melting, juicy texture of the Nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

HUNTER. Large, round, yellow, freestone.

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

Bartlett Pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushel or bushel boxes are best adapted. The fruit ought to be sorted and graded, wrapped in tissue paper and arranged in the container practically the same way that you pack Apples. Pears are sometimes packed in Peach containers, and sell to good advantage. Plain fruit can be sold without wrapping in small baskets or boxes. One or two Bartlett Pear trees in the city yard will furnish a considerable amount of fruit, a half dozen will supply the family with fresh fruit and a surplus for preserving.

Grown by
HARRISON BROTHERS
BERLIN, MARYLAND

OTHER FAMOUS PEAR VARIETIES

BEURRE BOSC. Large size, fine quality, brings highest market price. Late.

BEURRE D'ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich, vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.

DOUGLAS. Very resistant to blight. A winter Pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.

DUCHESS. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.

Plant Three or More Varieties of Pears for Pollination, Insuring Better Annual Crops.

A NATIONAL SCARCITY OF FRUIT TREES

There is a drastic shortage of fruit trees throughout the nurseries of the United States; as a matter of fact, the smallest supply available for 1948 orchard plantings that there has been at any time during the past fifty years. A recent national survey shows that fruit trees will even be more scarce during the next two years than now. Play safe—act quick—place your order now while trees are available.

Harrisons' Berlin, Maryland Grown Fruit Trees ARE HARDY IN ANY CLIMATE
Harrison Grown Pear Trees
Bear Bigger and Better Crops

The value of this fruit is being more and more appreciated by the people who really have become acquainted with it. On the leading markets during the past few years Pears have been bringing good prices. If growers would specialize in this fruit they would be well repaid for their efforts as high prices are always obtainable for choice Pears. This year we have a large supply of first-class trees in all the leading varieties; in fact, these trees are among the finest we ever grew. All our Pear trees are budded on whole root, blight-resistant seedlings.

**SURE CROPPER**
**EASY TO GROW**

Of all the Pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer is the only Pear that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial Pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with light vermillion cheek; flesh yellowish white, very juicy. Noted for being a long-time keeper. Most popular canned Pear.

A Leading Commercial Variety. New method of storing enables Kieffer Pear to have as good flavor as other varieties.

**QUINCES**

The Quince is of late attracting a great deal of attention as a market fruit. It is hardy and compact in growth and requires but little space. It is productive if handled properly and gives regular crops, coming into bearing in about two or three years and continues productive, if well managed, for forty years or more. The fruit is much sought after for canning, preserving and for jellies. It gives a delicious flavor to the Apple, cooking in any manner. They should be pruned ten to sixteen feet apart on deep, rich soil.

**ORANGE.** Late, large, bright yellow, excellent flavor, productive, and rarely fails to produce a crop. Best canning variety. Popular Wayne County (New York) strain.

**PRICES OF QUINCE TREES:** 3 to 4 feet, $2.50 each.
You're Sure of the
Highest Quality When
You Plant Harrison-
Grown Sour Cherry Trees

HANSEN'S IMPROVED
Bush Cherry
An ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect. 1-year bushes, bearing size, $1.50 each; 10 for $13.00.

Montmorency trees are strong, disease-resistant, very hard, generally starting to bear fruit in two years.

The superior strain which Harrisons' grow is a bud-selected strain from Montmorency. There are several different types and strains of Montmorency, which is often confusing to the public. We have experimented over a long period of years and have selected the best type and strain. You can depend on our superior strain of Montmorency, which is a real money-maker for the commercial orchardist.

EARLY RICHMOND. Exceedingly hardy and productive.

ENGLISH MORELLO. Large, blackish red Cherry. Hardy and productive. Very late.

Harrisons' Luscious SWEET CHERRIES

What fruit is more pleasing than the Sweet Cherry? The ideal fruit to plant in the back yard. We have a limited supply of first-class trees in the following varieties:

**BING.** Very large, dark brown, flesh firm, sweet. Midseason.

**BLACK TARTARIAN.** Very large, sweet, purplish black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown. Early.

**GOLDEN WAX.** Large, yellow, fine flavor. Bears bumper crops. Easily grown. All season.

**GOVERNOR WOOD.** Large, light yellow, marked with red; sweet flavor.

**NAPOLEON (Royal Ann).** Large, pale yellow, bright red cheek; sweet; excellent flavor; prolific bearer. Midseason.

**SCHMIDT (Schmidt's Bigarreau).** Large, sweet, deep black, tender, fine flavor. Midseason.

**WINDSOR.** Large, sweet, almost black, fine quality. Valuable late variety.

**YELLOW SPANISH.** Large, sweet, yellow with red tinge. One of the most beautiful and popular of the light colored Cherries. Heavy bearer. Midseason.

Extra Good Fruits for the Home Garden

APRICOTS

The Apricot is one of the most delightful luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early Cherries and before the best early Peaches.

**ALEXANDER.** Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large, prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

**EARLY GOLDEN.** Pale orange, juicy and sweet. Is a hardy, prolific bearer, ripens first of July.

**SUPERB.** Very good quality. Fruit is beautiful, light salmon colored, best of the older varieties. Tree is large, very thrifty, hardy and is extremely productive in fruit.

**MOORPARK.** Midseason. Large, freestone; flesh yellow, sweet, juicy. Good for canning or drying. Dwarf type, medium size tree.

ALEXANDER APRICOTS—Illustration Two-Thirds Actual Size
Grow Finer Flavored Berries
With Harrisons' Select Cumbria Raspberry Plants

LATHAM
WORLD'S LEADING RASPBERRY
The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we found it a remarkable variety in every respect; you will be both delighted and surprised after giving it a trial.

LARGE FRUITS—Tremendously Productive
Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Curtber, covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark, rich red.

A Blue Ribbon Winner for the Home and Commercial Grower. It simply cannot be equalled.

Harrisons' "SELECTED STRAIN" Raspberry Plants.  Triple Inspected, Disease Free. Preferred by Growers in Every State in the Union.

For Jumbo Size RASPBERRIES See page 5.

CUMBERLAND

The Most Popular Black Raspberry

LATHAM—The Big Red Raspberry

OTHER RED RASPBERRIES

CHIEF. A new Red Raspberry that is destined to challenge the supremacy of Latham, originated by the Minnesota State Breeding Farm and has been given rigid tests over a wide area. It has proven hardy, resistant to disease, a heavy cropper of large, excellent quality berries that will withstand shipment to market.

ST. REGIS. There is a demand for this fine fruit in the late summer and fall. Growers make exceptionally large profits when grown for markets. However, if you do not grow them for market, by all means plant a few bushes for home use. St. Regis produces a big crop at fruit during the regular season and continues bearing all summer and fall on the new canes.

CUMBERLAND
Mid-season to late. This is the most popular Blackcap of the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR
Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equalled by any other variety in quality, flavor and appearance. It is good to eat and good to sell.

PLANT ONLY DISEASE-FREE PLANTS
A good patch of Black Raspberries yields big profits, but in order to get profitable yields it is absolutely necessary to set only vigorous, disease-free plants. Harrisons' selected certified Black Raspberries are the best plants to be had. Under ordinary conditions they will yield from 1500 to 3000 quarts per acre, whereas weak or run-down diseased plantings only yield around 400 to 600 quarts per acre. The best plants are cheapest in the long run.

NEW LOGAN. A new Black Raspberry variety; probably its two most noteworthy characteristics are that it ripens about a week earlier and is more resistant to the virus diseases. A very productive variety and fruit of good size and quality. If an early berry is desired, it is one of the best. It does not crumble.

INCREASE YOUR PROFITS WITH #
The New Mammoth Berry That Will Revolutionize The Berry-Growing Industry

Two Inches in Length

The new Boysenberry is truly a clarified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all Bramble Fruits.

They are just as easy to grow as Blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 3 for $1.35; 6 for $2.40; 12 for $3.50; 25 for $5.50; 50 for $9.50; 100 for $16.50; 250 for $35.00.

LUcretia Dewberry

Long, mammoth black berries, recognized as the leading variety. Incomparably better in every way than any Blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before the earliest Blackberries. Big, uniform size makes them top-notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

No. 1 Plants: 6 for $1.20; 12 for $1.75; 25 for $2.75; 50 for $4.75; 100 for $8.25; 250 for $17.80.

Currents

Wilder. One of the strongest growers and most productive. Bunch and berry large, bright, attractive red color.

Large, 1-yr. bushes, $1.00 each; 3 for $2.85; 6 for $5.40; 10 for $8.00.

Gooseberries

Red Jacket. Big, roundish oblong berries with a mild sweet flavor. Delicious for fancy desserts, salads, conserves, pies, etc. Bushes lovely as shrubs. Small, yellow bloom.

Downing (Green). Large greenish yellow variety favored for shipping and canning. Highly flavored.

Large, 1-yr. bushes, $1.00 each; 3 for $2.85; 6 for $5.40; 10 for $8.00.
NEW GIANT Cultivated Blueberries

- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to $75 per quart—$300.00 per acre the third year. They are exquisitely mild, sweet and delicious and bring highest prices on the market. The demand for Blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Blueberries—Easy to Grow

Set the bushes 3 by 7 feet apart in a moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotted leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollination.

Very Ornamental

As an ornamental shrub the Blueberry cannot be surpassed. Full of lovely pink blossoms, which open to bell-shaped, white flowers in June. Plants are compact, few growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear big crops of luscious berries on your own grounds and are as easily grown as a shrub or rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these jumbo sized plants to offer. Can supply in the following varieties only: Cabot, Rancocas, Concord, Rubel, and Jersey.

Prices: Jumbo size, 4-year-old, 2 to 3 ft., $4.25 each; 3 for $12.00; 10 for $37.50.

LEADING BLUEBERRIES Listed in Order of Ripening

**Cabot.** Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

**Rancocas.** The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

**Concord.** The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

**Rubel.** A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

**Jersey.** The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripen about the same time as Rubel.

ASPARAGUS

It's Easy with

Harrisons' “Big Yield Strain”

MARY WASHINGTON

Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the market. Stalks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

The Famous True-to-Name
Mary Washington
Plant This Pedigreed Strain

There is no variety of Asparagus as good as Mary Washington and whether you are growing for home use only or for market you cannot afford to grow any other. This wonderful new Asparagus was developed and introduced by the U. S. Department of Agriculture and although it is just a recent introduction it has become famous the country over.

Rust-Resistant—Profitable

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

Large—Early—Tender—Juicy

Asparagus buyers now demand Mary Washington and are willing to pay fancy prices to get it. The demand for Mary Washington is tremendous because when it is once eaten, no other variety will give satisfaction. The stalks are purplish green color, large, tender and juicy. A very rapid grower, which means many cuttings.

New Gigantic
Red MacDonald Rhubarb

If you want something different, something delicious in garden fruits, then plant some of this grand new MacDonald Rhubarb.

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Sauce made from it has the red color of a dish of Strawberries. Flavor is mild and pleasing. This new Rhubarb does not send up seed stalks and never becomes tough or stringy. Just cut in small chunks and cook. Do not remove the tender skin; it cooks right up with the stalk.

Heavy plants: $1.00 each; 6 for $5.40.

SAVE A YEAR!
 PLANT JUMBO THREE-YEAR

Mary Washington Asparagus Roots

Yes, you can grow your own delicious tender Asparagus quick by planting our jumbo size roots. These roots are the cream of our three-year-old crop and have already borne large, early, tender, juicy Asparagus in the nursery. This is the selected pedigreed Mary Washington strain and is far superior to other kinds.

Plant Nut Trees

For Edible Foods and Landscaping

CHINESE CHESTNUTS

Now You Can Grow Chestnuts!

Blight-Resistant Chestnut Trees

Only two years from this fall, right in your own grounds, you can pick big, fat, tasty Chestnuts from the trees you plant this year! Remember gathering Chestnuts in the good old days—haven’t you felt sorry for your children because they couldn’t? The devastating blight that stripped our forests of the native Chestnut was an American tragedy! Now these hardy, blight-resistant Chestnut trees will bring them back. More than that, you need not wait 15 to 20 years for nuts—they’ll bear year after year! Plant in abundance Harrisons’ strain of Chinese Chestnut Trees.

PRICES: 2 to 3 ft., $4.00 each.

AMERICAN FILBERT

(Hazel Nut)
Old family favorite. Small, attractive bush, yielding abundant crops of tasty, round nuts. Bears very young.

PRICES: 2 to 3 ft., $4.00 each.

ENGLISH WALNUT

(Juglans Regia)
Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. The most popular Walnut grown.

PRICES: 2 to 3 ft., $4.00 each.

Plant Paper Shell PECAN TREES

for Shade and Nuts

PAPER SHELL PECAN

Medium to large nuts, oblong thin shell, rich flavor. Good grower. The best type Pecan grown. 2 to 3 ft., $3.00 each. 3 to 4 ft., $4.00 each. 4 to 5 ft., $5.00 each.

BLACK WALNUT

(Juglans nigra)
Rapid grower, spreading branches, large delicious nuts, prolific bearer. 2 to 3 ft., $2.00 each.

Harrison Brothers, Berlin, Maryland

AMERICAN PERSIMMON

Small trees highly ornamental and producing an abundance of pleasingly astringent, spicy fruits, highly prized when gathered after the frosts. 2 to 3 feet, $3.00 each.

Harrisons’ Selected Strain “Big Yield” Strawberry Plants Are Better

1. Sixty-four years experience in growing, propagating and handling Strawberries.
2. Every plant propagated by Harrison is the offspring of a selected plant that is outstanding in vigor and productivity.
3. Absolutely free from diseases and insects.
4. Grown on specially nurtured high ground soil.
5. Our method of digging enables us to get all the roots.
6. Clean, graded and packed in modern packing house.
7. Absolutely true to name.
8. Prompt service.

---

**Yes! A Living in Strawberries**

Today there are big opportunities for making money in growing Strawberries. Some of our customers, with little effort, make a nice living from one or two acres planted in our Selected Strain berries—it’s the way to financial independence for a lot of folks.

**BECAUSE WE GROW MORE PLANTS UNDER MODERN PRODUCTION METHODS, WE CAN SELL THEM FOR LESS MONEY.**

---

**WE GUARANTEE SAFE ARRIVAL NO MATTER WHERE YOU LIVE**

Extra precaution is taken at digging time to keep all the roots in field-fresh condition from the time they are lifted from the ground, until they are ready to be packed. Enough experienced labor enables us to freshly dig, grade, and ship your plants at the time you desire.

All plants are securely packed in damp, moisture-retaining material, and we guarantee our plants to reach you in good growing condition, no matter where you live.

Pick World's Finest Strawberries From Your Own Plants

A Big Profit From Your Own Back Yard

Everybody prefers the flavor of vine-ripened Strawberries. They are more delicious and usually sell for 10c to 25c more per quart. Customers pay premium prices for garden fresh Strawberries and small growers make real money, up to $3000.00 per acre.

Whether you have a small garden or several acres, you can make a big extra cash income by planting Harrisons' "Big Yield" Strawberries. Others are doing it, why not you. It costs only a few dollars to get started.

MIDLAND, new early season variety of the Premier family. Vigorous grower, prolific bearer with large to very large berries of excellent quality. Flesh is juicy, rich red. It is a good shipper as a commercial berry, is recommended for home gardens, being a time variety for fresh eating as well as preserving and quick freezing. Originated by the United States Department of Agriculture, Beltsville, Maryland

New Everbearer

Bears in 90 Days

No long waiting for delicious Strawberries. Every three varieties, Harrisons' are the best family. Garden Strawberries—Loads of Big Berries in 90 Days

Unlike the other varieties, Mastodon begins to bear luscious berries 3 months after planting and bears three big crops in 18 months. Customers have reported yields as high as three quarters per plant the first fall.

WHY WAIT A WHOLE YEAR?

Plant Harrisons' Big Yield' Mastodon this spring, and grow your own berries this summer and fall, instead of buying them. If you have more than you can use, they are easily disposed of in the nearby community, where they will bring top prices.

Strawberry Plants Are Scarce—Buy Now

Triple Inspected—By U. S. Government and State of Maryland inspectors; also by Harrisons' expert strawberry plantmen. All Strawberry plants are guaranteed to be free from all diseases and insects.

Harrisons' Everbearing Strawberries are bred for heavy yields and resistance to disease. Named after Prof. C. E. Harrisons of the University of Maryland, whose efforts started the work of cross-breeding Strawberries for disease resistance. Harrisons is not only a heavy yielder of fine looking berries, but they are of the finest quality and are suitable either for home or commercial production. One of the easiest varieties to grow, as it thrives on soil that is too wet for other kinds.
PREMIER King of the Early Berries

Too well known to need much description. The standard early berry by which all other varieties are judged.ホールド all records for big crops and big profits. Premier has filled more crates, made more dollars, and brought joy to more Strawberry growers than any other variety ever grown.

Adapted to All Soils—Heavy Yielder. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home gardens, local markets, or for shipping moderate distances it has outsold all the other varieties.

FAIRFAX, Early

The Sugar-Saving Berry

Color is a deep, full red; its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

STREAMLINER

EVERBEARER

CHESAPEAKE The Favorite Late Berry

It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first class condition. An exceedingly valuable commercial berry but equally adapted for home planting. We offer a selected “Big Yield” strain.

BLAKEMORE

No Strawberry has become so popular so quickly as Blakemore. It is the most popular variety in all America. Ripens several days before Premier and is equally dependable, producing big crops every year. The plant is healthy and stands up well during drought. The berries are large, firm, an attractive red and good quality. Fine for canning and preserving because it holds its color and shape so well.

DORSETT, Early

Large Fruit—Vigorous Grower—Heavy Crops

Dorsett berries average large size, considerably larger than the Premier; in fact, their size is comparative with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, being far more vigorous than most other varieties. Dorsett yields large crops of fancy, light red berries.

RED STAR

Here’s a New One

Extra Good—Very Late

This is the other new one by the U.S.D.A., and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large, and are borne on short, stout stems that stay well under the leaves, thus protecting them from late frosts. Makes a good fruiting row, and plenty of money can be made from growing this one, as late berries always bring a high price.

STRAWBERRY GARDEN OFFER

No. 21

25 BIG JOE
25 FAIRFAX
25 PREMIER
25 CHESAPEAKE
ALL FOR $3.75

BIG JOE The Old Reliable Mid-Season Variety

LARGE YIELD—FANCY FRUIT—FINE FLAVOR

Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well with good care and fertility. Be sure to include Big Joe in your planting this spring. Our big yield strain insures big crops.

CATSKILL Mid-Season

A mid-season berry that will produce the largest crops of bigger berries of any mid-season variety. Catskill is entirely satisfactory as to firmness, quality, color and attractiveness, season of ripening and climatic adaptation. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lupton. It is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to pick at in picking.

PERISHABLES

Extra! STRAOLINER

The Greatest Everbearing Strawberry

SWEET AS HONEY — EXTRA LARGE EXCELLENT FOR EATING FRESH OR FREEZING MAKES HEAVY FRUITING BED

- Berries in 90 days or less. No need to wait several months. Plants planted in March or April will commence bearing in early July and bear until frost.
- Three Big Crops From One Planting. Streamliner needs no nursing along as some everbearers do. They are three-berry growers and do not require exacting soil requirements. Pick your first crop this summer, and fall second crop next June, third crop the following summer and fall.
- It costs less to grow your own berries if you plant Streamliner. Easy to grow, just space them 12 to 15 inches apart in the row with the rows 2 1/2 to 3 1/2 feet apart.
- Profitable to raise. Grow all the berries you need for your own use and sell the rest to your neighbors.
HARRISONS' BIG YIELD GRAPE VINES

BEAR BETTER CROPS OF BETTER FRUIT.

Harrison Brothers Selected Varieties Grapes

CACO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

DELAWARE. Red. Early midseason. Bunches are very large, firm, and juicy, very sweet and refreshing. Vine very hardy and productive. Requires rich soil, good culture, close pruning.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully 14 days before Warden.

NIAGARA. White. Midseason. Best of the standard light-colored Grapes. Bunches are large, greenish white berries change to pale yellow when fully ripe. Rank grower and very productive. Popular with viniardists and home gardeners in the North, as well as the South.

WORDEN. Blue. This excellent Grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

PLANT THE BEST

The soil on which our vines are grown is especially adapted to root growth. Our propagating stock is selected from healthy, vigorous, heavy bearing vines. This results in a vine that will give you 100 per cent satisfaction in your vineyards.

For Quick Crops Plant
JUMBO GRAPE VINES

Big crops of luscious Grapes, some the first season planted. No other fruit bears so much for so little attention. Our Jumbo Grape Vines have already fruited in the nursery. We can furnish the following varieties only in Jumbo sizes: listed in their order of ripening: Fredonia, Worden, Concord, Agawam, Niagara, Catawba.

Prices: 90c each; 3 for $2.40; 6 for $4.20; 10 for $6.50; 25 for $13.75; 50 for $25.00.

Harrison Brothers Grow at Berlin, Maryland. The Grape Vines We Sell.

For Bigger and Better Crops Plant
HARRISON'S SUPER STRAIN CONCORD

Blue, mid-season. The most popular and extensively planted Grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

Exceptionally Heavy Yields

Concord is a very vigorous grower, hardy and very productive. It ripens during mid-season, and is rated as the best money-making commercial variety.

CALIFORNIA PRIVET

This is the universal hedge in the East, a fact proving that Privet has greater merit under ordinary conditions for this purpose than any other plant. For live fences at village, town and country homes, it is the very best of all materials. On public grounds of all kinds, parks and cemeteries, along roads and paths, on factory grounds, and on newly subdivided areas near towns, nothing else can be used in its place, and in this place it is indispensable. It is the best of all hardy hedge plants. Can be kept at any height desired; has glossy, deep green leaves, and holds them until late fall. Its strong, quick, upright growth makes it useful for screening out unsightly objects.

HOW TO PLANT

California Privet grows faster than any other hedge plant. For a thick hedge close to the ground the plants must be set close together, about 6 to 12 inches apart. Plow or dig a trench about 1 foot deep and 1½ to 2 feet wide. The plants should be planted deep enough so that the soil covers the first three inches of the lowest branches. Fill around the plants with top soil and firm the soil. Water thoroughly after planting. Cut plants back to about 4 inches from the ground after planting; this will result in a dense hedge at the bottom of the plants. After hedge reaches desired height it can be kept trimmed so as to remain at that height.

SPIRALEA VAN HOUTTEI

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen in groups in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra large supply of all classes plants this year and are pricing them especially low.

RED-LEAVED BARBERRY

(Barberis Thunbergi Atropurpurea)

A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out with the shrub foliage depended on for color. Red berries during winter.

GREEN BARBERRY HEDGE

GREEN BARBERRY

(Berberis Thunbergi)

The best low, dense hedge plant grown. Its abundant, small, light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

PRICES PER PLANT

**MAGNOLIA SOULANGEANA NIGRA**

Small tree or bush with large, 9-petal dark pink flowers before the leaves in the spring. Grown by Harrison Bros., Nurseries at Berlin, Maryland.

**DOUBLE RED FLOWERING PEACH**

FLOWERING PEACHES

**DOUBLE RED FLOWERING PEACH**

During early spring the flowering Peaches are covered with a mass of beautifully formed and highly colored double flowers. Highly recommended. Perfectly hardy, thriving in any soil in which other Peaches grow. We make a specialty of growing Flowering Peach trees and have several hundred to offer. We offer Double Red.

| Each | Price: 11¢ to 2 feet, $4.00 each. |
| 3 to 4 feet | $1.75 |
| 4 to 5 feet | $2.00 |
| 5 to 6 feet | $2.25 |

**GENUINE DOUBLE WHITE FLOWERING CHERRY TREES**

One of the most lovely spring flowering trees. Large, double, pure white blossoms that envelop the entire tree. The best and easiest flowering Cherry tree to grow. No planting is complete without one or more of this remarkable variety. Widely used for planting along streets and avenues.

| Each | Price: 11¢ to 2 feet, $4.00 each. |
| 3 to 4 feet | $2.25 |
| 4 to 5 feet | $3.25 |

**PURPLE-LEAVED OTHELLO PLUM**

Upright grower, foliage brilliant reddish purple, holding its color throughout the season. Pacific bearers, with crimson fruit producing ornamental effect.

| Each | Price: 11¢ to 2 feet, $4.00 each. |
| 3 to 4 feet | $1.75 |
| 4 to 5 feet | $2.00 |
| 5 to 6 feet | $2.25 |

**“The Rare FRANKLINIA”**

Frankinia altamahoa.

Beautiful blooms and blazing foliage bring beauty to any planting. Flowers start opening in mid-August and continue until frost. Flower clusters appear as small balls covered with whitish green satin when unfounded. The guard petals are orange-salmon, snow-white, elaborately frilled and pleated. The snowy white chalice is 3 inches in diameter and of brilliant irregularity, holds a sumptuous mass of the rich orange-golden stamens having a delicate balmy fragrance. The leaves unfurl a delicate bronze-red, 1 to 2 inches long at maturity by about one-third as wide; a rich dark green with red veining. In autumn the entire tree blaze of rich scarlet color. Produces a beautiful effect in any planting 2 to 3 ft., $3.50 each.

**BECHTEL’S FLOWERING CRAB APPLE**

Only genuine double-flowered Crab. When in bloom, appears to be covered with delicate pink, perfectly double, small roses of delicious fragrance. Best flowering Crab Apple.

| Each | Price: 11¢ to 2 feet, $4.00 each. |
| 3 to 4 feet | $5.00 |

**RED FLOWERING CRAB**

Handsome, attractive flowering tree. Perfect for small gardens and landscape planting.

| Each | Price: 11¢ to 2 feet, $4.00 each. |
| 3 to 4 feet | $2.00 |

**BECHTEL’S FLOWERING CRAB**

One of the most beautiful flowering trees. Grown by Harrison Bros., Nurseries at Berlin, Maryland.

**RED FLOWERING DOGWOOD**

Corynus Florida Rubra

One of the most popular small ornamental trees. Handsome red flowers in early spring. Makes an attractive lawn specimen.

| Each | Price: 11¢ to 2 feet, $4.00 each. |
| 1½ to 2 feet | $3.50 |

The Best Selections for 1948 Plantings, Grown by Harrison Bros., Nurseries at Berlin, Maryland.
NORTHERN STRAIN

CHINESE ELM

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-woode shade tree. It resembles the American Elm except that leaves are smaller, with the gracefulness of a Cut-Leaf Birch. Prices: 6 to 8 ft., $2.25 each; 8 to 10 ft., $3.00 each.

ORIENTAL PLANE

(Platanus Orientalis)

A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. The Oriental Plane, being originally an imported tree during the past generation, has rapidly won high popularity in recent years due to its many merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Harrisons’ Nurseries are specializing in growing Oriental Planes and we are the largest growers in America. Prices: 6 to 8 ft., $3.50 each; 8 to 10 ft., $5.00 each; 10 to 12 ft., $7.00 each; 12 to 14 ft., $11.00 each.

CHINESE ELM—Quickest Growing Tree in the World

PIN OAK

America’s Favorite Oak Tree

The tree of trees—no other tree is more beautiful—once planted the Pin Oak continues to grow for a lifetime. Some of the finest, most attractive plantings depend almost entirely on the stately Pin Oak for their landscape appeal. Beautiful Bronze Color During Autumn Deeply cut, bright, fresh green foliage during the summer, turning to a bright bronze color during autumn. The most graceful tree for the lawn, equally as desirable for street or roadside planting. YOU’LL NEVER REGRET PLANTING PIN OAKS Prices: 8 to 10 ft., $7.00 each; 10 to 12 ft., $11.00 each; 12 to 14 ft., $15.00 each.

NORWAY MAPLE

(Acer Platanoides)

Typical Maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Prices: 6 to 8 ft., $5.00 each; 8 to 10 ft., $7.00 each; 10 to 12 ft., $11.00 each; 12 to 14 ft., $15.00 each.

BABYLON WEEPING WILLOW

(Salix Babylonica)

A rapid growing, hardy tree, thriving in any moist soil. The Willows are valuable and interesting subjects on account of their graceful aspect. Prices: 5 to 6 ft., $1.50 each; 6 to 8 ft., $2.25 each.

LOMBARDY POPLAR

(Populus Nigra Italicca)

A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful. Prices: 5 to 6 ft., $1.00 each; 6 to 8 ft., $1.25 each; 8 to 10 ft., $1.75 each.

[41]
IRISH YEW

*Taxus Baccata* (Hibernica)

This evergreen is the aristocrat member of the Yew family. It grows tall and narrow with stout, crowded branches and spirally placed leaves which are dark green in color. This Yew is very scarce, but everyone who sees it is enthusiastic about it. Formerly it was imported from Europe, but after all importations were discontinued by the Federal Government, American nursemens were unable to supply their customers. Fortunately, we had some specimen plants in our nurseries from which we were able to propagate.

**Spreading Yew**

(*Taxus Cuspidata*)

The beautiful Yew of moderate bushy growth, usually grows wider than it does tall, starts branching from the bottom, developing into a bush form. The spreading branches are densely clothed with short leaves of dull green. It is the most attractive spreading evergreen on semishady locations. Hardiest of all Yews. By trimming the side branches the plant can be made to grow semi-upright and likewise by trimming the top branches the plant can be made to develop lower to the ground. Can also be trimmed into globe shape. **Prices:** 12 to 15 inch, $2.50 each; 15 to 18 inch, $3.00 each; 18 to 24 inch, $4.00 each.

**Compact Globular Arbor-Vitae**

(*Thuja Occidentalis Compacta*)

Natural compact, globe-shaped, dark green foliage. The ideal low-growing plant for massing against the taller evergreens in foundation plantings. **Prices:** 12 to 15 inch, $1.75 each; 15 to 18 inch, $2.25 each.

**ALL EVERGREENS MOSS BALLED**

All evergreens are taken up expertly to secure the tender roots, the soil removed, and then the roots packed into Transplant and balled in wet mass and wrapped. By this method we are now able to eliminate 50 to 60 pounds of soil, making low cost express shipments possible. This method also insures excellent growth and quicker root action. In planting remove wrapping and use moss in half around roots. It desired balled in soil and burlap, add $1.50 per plant to cover additional handling and special packing.

**Veitch’s Silver Retinospora**

(*Retinospora Serrata Veitchii*)

Foliage silvery blue, feathery and dense, giving a soft, waxy appearance. Broad, pyramidal outline, can be kept any height by trimming. One of the best Retinosporas. Price: 18 to 24 inch, $2.75 each.

**Pyramidal Arbor-Vitae**

(*Thuja Occidentalis Pyramidalis*)

A really beautiful evergreen that should be included in every planting. It grows tall and narrow, requires no trimming, and retains its bright green color throughout the whole year. A pair of them placed at the entrance to a home makes a very attractive feature. Our Pyramidal Arbor-Vitae are grown with extreme care and each one is a specimen. **Prices:** 18 to 24 inch, $2.25 each; 2 to 3 feet, $3.00 each; 3 to 4 feet, $4.25 each.

**Hicks’ Yew**

(*Taxus Cuspidata Hicksii*)

Another form of Yew that is very similar to the Irish Yew, but is a much faster grower. The branches ascend almost vertically, generally growing with many stems. Its rich dark glossy green makes it much more attractive than Arbor-Vitae or Junipers. We can unhesitatingly recommend it for planting in all sections. It has proven to be perfectly hardy. An extremely narrow effect is desired can be obtained by trimming the sides of the plant when it is small. This variety is extensively used for making high class evergreen hedges. **Prices:**

ALTHEA or ROSE OF SHARON (Hibiscus Syriacus). The double and single flowers are formed in varying colors. We can supply double red, white with crimson center, and double white.

BUDDLEIA MAGNIFICA. New and undoubtedly the finest of all the summer-flowering Butterfly Bushes. Large, bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged with rose, appear in mid-June.

DOGWOOD, RED-BRANCHED (Cornus Alba Sibirica). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

GOLDEN BELL (Forsythia). Vigorous, upright grower; profusion of yellow flowers in April. One of the best early blooming shrubs.

HONEYSUCKLE, BUSH (Lonicera Morrowi). Early white flowers in June, followed by red berries.

HYDRANGEA PEE GEE (Hydrangea Paniculata Grandiflora). Large flowers, first snowy white, then pink, changing to reddish bronze in fall. Blooms midsummer to fall. 18 to 24 inches, 90¢ each.

SPIREA BILLIARDI. A hardy type of Spiraea that grows exceedingly well in dry places. Long, fluffy flower spikes. We offer two colors: white and pink.

SYRINGA, SWEET MOCK ORANGE or GARLAND (Philadelphus Coronarius). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB (Calycanthus Floridus). Hardy native with many double, chocolate colored flowers in May. Flowers, leaves and even the wood have a spicy fragrance.

TAMARIX, AFRICAN (Tamarix Africana). Feathery gray-green foliage; very showy.

TARTARIAN HONEYSUCKLE (Lonicera Tatarica). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (Weigela Rosea). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

HARRISON'S HARDY VINES
Nature's Draperies

BOSTON or JAPANESE IVY (Ampelopsis Veitchii). A popular climber, clinging firmly to brick, stone or other material; deep, glossy green, ivy-shaped foliage which turns to cream and gold in autumn. Price: 75¢ each.

CHINESE WISTARIA. A rampant growing, clinging vine. Blue flowers in large, drooping clusters during May and June. Price: $1.25 each.

ENGLISH IVY (Hedera Helix). The most popular evergreen vine; large, deep green, glossy foliage. Excellent for covering walls. Useful for shady locations. Price: 75¢ each.

HALL'S HONEYSUCKLE. Deep glossy green foliage; fragrant flowers from July to fall. Price: 60¢ each.

SWEET AUTUMN CLEMATIS (Clematis Paniculata). A splendid climber for covering porches and trellises. Flowers snowy white; produced in immense quantities during late summer and autumn. Price: 75¢ each.

SILVER LACE VINE (Polygonum Auberti). Will rapidly grow 20 feet or more. Forms cloud of lacy, misty white, shot with tints of cream and pale rose. Green foliage, lightly bronzed at tips. Price: $1.00 each.

GORGEOUS LILACS
Lilacs are marvels of beauty and elegance. They are one of the first plants to bloom in the spring. Perfectly hardy in any locality. We can supply the following colors: White, Purple, Pink and Blue. State color desired. Prices: Field-grown plants, $1.50 each; 2 for $2.80; 10 for $13.00.

[43]
Everywhere people are making their homes more livable, more attractive. A little planning, a little planting. And what joy and satisfaction in having a home framed with beautiful trees and a well kept lawn planted to shrubs and flowers.

Our method of packing enables us to ship our nursery stock thousands of miles with the stock arriving in field-fresh condition. We guarantee safe arrival no matter where you live.

HARRISON BROTHERS
Berlin, Maryland

CREPE MYRTLE (Lagerstroemia Indica). Small green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1 1/2 to 2 ft., $1.50 each.

QUINCE, FLOWERING (Cydonia Japonica). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs. 1 to 1 1/2 feet, $1.00 each.

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall. 15 to 18 inches, $1.00 each.

WEIGELA, EVA RATHKE. Very attractive deep corn-rose-red flowers, making a very showy shrub. 1 1/2 to 2 ft., $1.00 each; 2 to 3 ft., $1.25 each.

BEAUTY BUSH. Pink tubular flowers, heavy bloomer, hardy. 2 to 3 ft., $1.25 each.

THE GLORIOUS SPIREA VAN HOUTTEI—What a Beauty!

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen, in groups, in border planting, and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low:

Harrisons' Bush Arbutus
(ABELIA GRANDIFLORA)
By Far the Best Evergreen Shrub
Thousands of Blooms the First Season

HARDY — THRIVES EVERYWHERE
One of our beautiful, popular and satisfactory broad-leaved evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shady locations.

GROWN WHERE ROSES SUCCEED THE BEST

HARRISON BROTHERS, BERLIN, MARYLAND, WHERE THE SOILS AND CLIMATE ARE IDEAL FOR PRODUCING EXTRA FINE QUALITY ROSES
Every Rose Will Bloom This Year

ETOILE DE HOLLANDE. At present considered most popular of crimson Hybrid Teas. Velvety scarlet-crimson with delicious fragrance, and enormous petals. It charms continuously with its delightful color, vigorous growth, and well formed flowers on long stems. Faultless.

KAISERIN AUGUSTE VIKTORIA. Perfect creamy white bloom, slightly tinged with lemon, large and full. Long, shapely buds to full petalled, deliciously scented bloom. An old favorite that even today has not been surpassed.

PINK RADIANCE. A brilliant carmine-pink with yellow shading at base of petals, having a light silvery tone on the inside, and deeper on the outside. Vigorous, free bloomer, parent of Red Radiance. Among the oldest Roses, it has made good everywhere.

POINSETTIA. Brilliant rich scarlet-red. Hues: ideal long, pointed buds; glorious flowers. Vigorous, tall grower, long stems, and richest scarlet-red. Grand, being a very fine Rose. Should be planted in every Rose garden.

PRESIDENT HERBERT HOOVER. One of the outstanding Roses. A glorious new Rose of vivid cerise-red toned with yellow, orange and scarlet, richly perfumed and free flowering.

RED RADIANCE. A sport of the famous Radiance and identical in all characteristics except color. A brilliant cerise-red color, and intensely fragrant. Tall and bushy, healthy foliage and excellent blooming qualities. The favorite red Rose of America's millions.

TALISMAN. A multi-colored, glorious combination of orange, yellow and rose-red. They simply eclipse other Roses in autumn. Fine for decoration and cutting. The triple-tone flowers are produced all season.

WHITE RADIANCE. A genuine white sport of the ever popular Pink Radiance. Very vigorous, tall and bushy. Thrives extra well; intensely fragrant. Should be in every garden.
